

SEABUBBLES

PIONEERS IN WATER MOBILITY

0 WAVE 0 NOISE 0 EMISSION

ZERO-WAVE ZERO-NOISE ZERO-EMISSION

To revolutionize transport, enabling all to enjoy the journey of discovering our marine heritage, we design and engineer a new generation of boats, **flying above the water**, powered by **hydrogen** with **zero emission**, offering every nature lover a magic navigatory experience.

SEABUBBLES: GREEN TECH IS WHERE THE BEAUTY IS

As pioneers in green mobility, we bring cutting edge innovations of foils and hydrogen propulsion combined to produce a true gem of eco-friendly navigation by **emitting water**. And only water. Navigating on the Bubble is as gentle for the passengers as it is for the environment, flying to be light... as a sea bubble!

TECHNICAL DETAILS

- Retractable foils
- Falcon-wing doors
- Hybrid power source
- Cruising speed: 18 kts (35 km/h)
- Take-off speed: 10 kts (18 km/h)
- Autonomy: 2h30
- H₂ refueling: 4min

DIMENSIONS

- 8 to 12 pax
- Length: 8 m
- Width: 3,5 m
- Light weight: 3 100 kg
- Draft foils up: 1 m
- Draft foils down: 2,10 m

EMBEDDED ENERGY

- Fuel cell: 60 kW
- H₂ storage: 2 or 3 x 3,6 kg
- Battery packs: 22 kWh
- Electric motors: 2 x 45 kW
- Nominal energy: 240 kWh
